

***TOP TEN REASONS TO USE HAUSE'S GROUP HEALTH ACTUARIAL SERVICES FOR YOUR CLIENTS***

**1. Hause only provides Actuarial Services**

We leave all traditional consulting and bidding services to you. Hause does not perform such services so you don't ever have to worry about us being in competition with you – we guarantee it.

**2. Work flows through you**

You stay in control. We encourage you to handle all data gathering and interfacing with your clients and vendors.

**3. Findings delivered to you**

Findings and communications go direct to you whenever possible. This way, you can present the work products to your clients and be sure that the messages are consistent.

**4. Fast turnaround**

Hause typically requests a week to 10 days, but can turn projects around the same or next day.

**5. Efficiencies = reduced costs**

By working with the same people at your firm, our business relationship will develop operational efficiencies, saving you and your client time and money.

**6. Subcontract or direct bill**

We can be your subcontractor or bill your client directly...you decide.

**7. Give your firm a competitive edge**

Our relationship will keep your competition from getting their foot in the door by claiming they provide actuarial services. How does having a Fellow of the Society of Actuaries since 1980 on your team sound?

**8. A Tradition of Excellence**

John Ahrens, FSA, MAAA, responsible for delivering Hause's Group Health Actuarial Services first started providing Cobra certifications to TPAs in 1989.

**9. Quality work product delivered by a Senior Actuary**

Hause utilizes sophisticated methods and models based on 30 years of extensive Group Actuarial experience combined with Hause's internal programming resources to produce work products.

**10. Simple data requests**

Data requests for all projects are typical of information requested for stop loss writers. IBNR reserves will add a request for "lag charts" from claims administrators.
